

## PROFILE

### Technologies:

**HTML/CSS/JavaScript/NodeJS  
Express/Bootstrap/MySQL/  
Sequelize/Handlebars/Bcrypt.  
MVC Architecture Pattern.  
API Management and Rest Services.**

Experience developing several projects with the technologies mentioned above.

I can contribute to the company with my knowledge in the semantic structure of HTML as well as changes that could be made in the frontEnd using CSS or Bootstrap. I can also contribute with my knowledge in JavaScript to help in the backEnd.

Search for personal improvement, job stability and opportunity for growth in the IT area.

## HOBBIES AND INTERESTS

Physical and sports activities like climbing, basketball. Reading (focused on personal development), play guitar.

## ADDITIONAL FEATURES

- English 80%
- Available to start working right away.

High School Diploma

## WORK EXPERIENCE

### Tag for Tags – Clothes Sales

June/2019 – Present

Started a my own business importing/selling Levi's clothes.

### Acura Sales executive

February/2019 – April/2019

Sale of new and used cars. Excellent customer service and prompt solution to concerns and problems. Knowledge of basic mechanics, appraisals of units used for their purchase and subsequent sale.

### Github Project – NurseXpress

The last team project I've worked on is called **NurseXpress**. Our idea is based on providing nursing services to people who need it without leaving home, such as an injection, receiving serum etc. As well as generating freelance work for nurses. In this project work on both backEnd and FrontEnd. **In the backEnd I worked** mostly on **controllers, models and the views using handlebars**. **In the frontEnd I worked mostly in responsive web desing**. **Link to deployed Web:**

<https://nurse-express-s.herokuapp.com/>

### Github Project – Developers-Fun-Blog

This is my most recent project. I used the **MVC architecture pattern** to develop this project. I used in the **backEnd: JavaScript, NodeJS, MySQL, Sequelize, Express, Express-Session, Bcrypt** and **Handlebars** to display all my views. I used in the **frontEnd: Bootstrap**. **Link to deployed Web:**
